

*November 16, 2020*

*Dear Families of Aspen 7th and 8th Graders,*

*Each year public schools in New Mexico are required to teach some health standards having to do with Reproductive Health. We've done this every year for years. This year will be a bit unusual in that we are in your homes.*

*I want to be completely transparent so there are no surprises. I would like to meet with you this Thursday at 5:30. The purpose of the meeting is to make sure you all know the curriculum, to introduce you to the experts who present the lessons along with our school nurse, Allana Cartier. I will also provide you with opt out forms in case you make that choice.*

*The information covered in these lessons is important for students entering puberty to have. I do realize, however, that some families will opt to take this task on themselves. Regardless, it will be helpful to all to know the curriculum.*

*I look forward to seeing you all Thursday.*

*Sincerely,*

*Tina Morris*
